### About This Game

Even if these girls are outrageously gorgeous, they are so well known for the very reason that nobody could ever manage to conquer them.

Therefore it will be a tough challenge, nothing - and nobody - can be taken for granted.

The game will make the player face some decisions, and by directly controlling his character's dialogues he will unlock specific reactions.

So are you ready to start this rich and intense adventure where for once your choices really matters?

Our game offers more than 40 primary and secondary choices. These choices will positively and negatively influence how the story unfolds.

- Take control of our main character; be the one to decide his dialogues. "Be good" or "bad", it's up to you!

CHOOSE CAREFULLY  
WHAT TO  
SAY

- Our girls will react differently depending on the situation!

OUR GIRLS WILL REACT  
DIFFERENTLY

- But obviously, there is much more! Other than making good and bad choices, the player will have the chance to unlock specific personality traits, as his behavior is shaped.

Also:

- Unlock 15+ Locations and backgrounds made by our artist Ria (winner of the "2015 Last Draw" nationwide anime-style illustration competition).
  - 30+ Artworks made by our artist Bicio (winner of the "2015 Latin American Manga contest").
    - Trading cards & Achievements.
    - Unlock and listen to our soundtrack whenever you want!
    - Collect secret artworks and bonus scenes in our Art Gallery.

Each artwork and background of our Visual Novel is available in 4k ULTRA HD resolution, which offers clearer and more detailed images even at lower resolutions.

A very interesting VR experience. It's a ggreat game to show fans of Ghostussters! Pretty short but graphics are an 8/10 and was worth the amount of a good coffee!. Great fun little arcade racer and a beauty to look at, but only worth it if you get the Ice and Fire DLC. You can't have a great Rally Racer without fantastic snow themed race tracks.. The game should not be available for Oculus. Its so annoying to play it with Oculus. The game seems not to be updated anymore but its still early access. I don't recommend to buy it. Sad, it seemed to be good when researching in web.. Velocibox's gameplay basically follows the tag-line of the film *Edge of Tomorrow*: **Live. Die. Repeat.**

That's all there is to it. No checkpoints, no saves. Just maddening repetition until you finally make it all the way through the game, or give up.. literally the best game i have ever played in my entire life 0V10

so so♥♥♥♥♥do not buy. If ever someone wanted to relax, build and have fun this is a wonderful game. I have played almost an hour and i love it.. Took longer to download then to finish. I simply love this game. Its all about micromanaging your business. You need another workshop? Build it but are the people satisfied? No? Then take care of their needs or no one will work for you! Be sure to remember about housing!. draco mode does not work only jet mode works (draco mode stays on 0), if the game had other features then perhaps I will buy it again!. cant wait when its finished. This was straight butt cheeks. Game constantly crashed on me.
